

FELINS

FLEX STRAP[™]

Automated In-Line Systems

The Felins Flex Strap XLA-24 automated stretch film bundling system provides cost saving benefits through increasing production while reducing labor.

This system comes complete with (2) 10' sliderbed rough top belt conveyors, adjustable infeed product guides, remote e-stop/start controls and auto start infeed sensor. These components are fully integrated and controlled by the XLA-24 stretch film bander with pneumatic product clamping and a touch screen operator interface which controls the number of wraps per band and the distance between bands.
