

Rotary PakTyer 2000™

ROTARY TYING STATION

Felins PakTyer 2000™ Rotary Tyer is designed for quick and automatic tying for a wide range of bundling applications. The open frame design allows the operator to directly place the bundle onto the table of the tyer and initiate the tying process with a foot trip activation. The rotating arm then passes around the product twice to securely tie the bundle. This style of machine can also be set up to cross tie, single tie or triple tie. Felins offers the Rotary PakTyer 2000™ in five different sizes with bundle processing speeds that range from 36 – 44 (2 wrap cycles) per minute. Tying materials include polytape and twine.
