

The US-2000 Ultra-Sonic Banders

The modern features of the US-2000 banding machine makes unitizing various products easier and more cost effective.

Key features include:

- user friendly controls
- sensitive tension controls
- minimal waste
- recyclable materials

The cold-welding Ultra-Sonic technology ensures fast, clean, and consistent sealing. The welder has no film build-up and no heating elements to replace. The machine is ready for immediate use; no need for preheating. Ergonomic construction, computer control and malfunction indicators ease operation of the machine.

The US-2000 LB loop machine's open arch is suitable for products which vary in size and can be removed from the top.

The Ultra-Sonic US-2000 AB is constructed as a modular system. It is suitable for incorporation into fully automatic systems. The US-2000 AB can be delivered in various sizes. Special arch sizes up to a width of 1300mm and a height of 900mm are available for special applications.

Arch Sizes

US-2000 LB

Width	340mm
Height	180mm

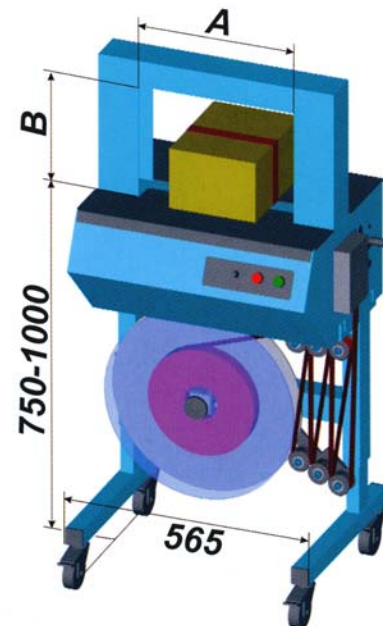

US-2000 AB

Arch Sizes/mm	A	B
	100	x 120
	260	x 120/180/260/360
	360	x 180/260/360/500/750
	500	x 260/360/500/900
	700	x 260/360/550/750/900
	900	x 260/360/500
	1300	x 750
