

TAG-TYER

Felins TAG-Tyer semi-automatically produces hanging tags or textile loops and offers the ability to process a variety of elastic materials.

This compact tabletop model allows operators to process various tag sizes and create multiple loop sizes. The ease of adjustment and operation enables users to handle small orders quickly and cost effectively.

Perforated hanging tags are pulled across the knotting table to a pre-determined length. The loop is automatically tied when the foot switch is activated.

Equipment Features

Performance: Tie up to 800 tags per hour

Dimensions: 100cm (L) x 42cm (B) x 65cm (H)

Weight: 32kg/70lbs

Power: 110V AC

Felins offers a variety of elastic tying materials to allow users to quickly and cost effectively create tag loops for commercial and industrial applications.
